

Your Digital Psyc Library — Authoritative Resources from the American Psychological Association (APA)

Your faculty and students need access to a holistic collection of high-quality resources that will meet the diverse needs of your users in psychology, sociology, business, nursing, law and education – whether they are conducting research for a thesis, developing training programs or writing a research paper. For optimal research value, each record in APA’s databases contains controlled vocabulary terms from the APA’s Thesaurus of Psychological Index Terms.

APA PsycInfo®

With more than five million interdisciplinary records, the APA PsycInfo index is the indispensable discovery resource for the field. Coverage spans from the 1800s. Each bibliographic record is created by APA’s skilled and knowledgeable staff. Users can conveniently link to full text in other APA databases and other full-text databases your institution subscribes to from EBSCO.

APA PsycArticles®

APA PsycArticles offers access to the complete electronic catalog of APA peer-reviewed journals, giving researchers the ability to explore more than a century of trusted research across the full collection. Updated twice weekly, the database includes First Posting of the latest articles, ensuring access to the newest findings. APA journals have a significantly higher share of citations relative to the number of articles published.

APA PsycBooks®

APA PsycBooks is the APA's library of DRM-free, full-text e-books and includes the full text of the entire multivolume reference book series APA Handbooks in Psychology and the exclusive electronic release of the APA/Oxford University Press Encyclopedia of Psychology.

APA PsycTests®

This database is an authoritative source of structured information about tests of interest to a variety of fields. It provides access to thousands of actual test instruments, most of which are available for immediate download and use in teaching and research.

APA PsycExtra®

The gray literature indexed in APA PsycExtra makes it a preferred source of innovative reports, ground-breaking conference papers, developing ideas, and more recent research than what is typically found in journals and books. When combined with conventional research materials, users gain vital insight across the spectrum of the behavioral and social sciences.

APA PsycTherapy®

APA PsycTherapy is a streaming video database of therapy demonstrations with hundreds of videos showing various treatment approaches. APA PsycTherapy is intended for educational purposes, specifically in clinical training and counselor education, and provides clinicians, counselors, and trainees the opportunity to observe candid psychotherapy videos featuring known therapists.
